VINAY H M

Aspiring Software Engineer | Computer Science & Business Systems Student

Hassan, Karnataka · +91 911 06 27745 · hmvinay355@gmail.com · LinkedIn · GitHub · Portfolio

PROFESSIONAL SUMMARY

Computer Science and Business Systems student with hands-on experience across data analytics, full-stack web development, AI systems, computer vision, and IoT edge intelligence. Proficient in Java, Python, and C++, with working knowledge of JavaScript, Flask, SQL, and business data visualization. Completed an industrial Data Analytics internship at Intrainz and received an official Letter of Recommendation. Seeking a Software Engineering or Data Analytics Internship to build robust, scalable, and user-centric solutions.

TECHNICAL SKILLS

Programming Languages:	Python, Java, C++, JavaScript, SQL
Full-Stack & Frameworks:	Flask, REST APIs, HTML5, CSS3, JavaScript, Flutter (Mobile)
AI & Embedded Systems:	LLM Integration (Google AI Studio APIs), Prompt Engineering, Edge AI (TFLite Micro),
Databases:	MySQL, SQL, SQLite, Firebase, Database Management Systems (DBMS)
Cloud, DevOps & Analytics:	Tableau, Power BI, Excel (Pivot Tables, Table Matrices), Git, GitHub, Version Control, Blockchain (Ganache/Web3)
CS Fundamentals:	Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP),

EXPERIENCE & INTERNSHIPS

Data Analytics Intern | Intrainz Innovation Pvt. Ltd., Bengaluru — **Jan 2026 – Mar 2026**

Technologies: Tableau, Data Cleansing, EDA, Pivot Tables, KPI Tracking

- Executed exploratory data analysis and data preprocessing across enterprise sales and customer datasets, resolving data discrepancies and normalizing multidimensional records.
- Engineered dynamic executive dashboards in Tableau featuring calculated fields, pivot matrices, scatter plots, and geo-maps to monitor revenue drivers and regional sales metrics.
- **Result:** Delivered client-ready analytical presentations and earned an official Letter of Recommendation recognizing quality deliverables (ID: 01 26BDA8339).

Data Visualisation Job Simulation | Tata Consultancy Services — **Feb 2026**

Technologies: Tableau, Power BI, Business Analytics, Scenario Framing

- Framed strategic business questions and exploratory analyses to align retail client revenue metrics with executive leadership priorities.
- **Result:** Designed interactive dashboards in Tableau and Power BI that streamlined executive insight generation and performance review.

KEY TECHNICAL PROJECTS

VoteSphere DB – AI & Blockchain-Based Secure Voting System Live Demo — **Academic Project**

Technologies: Python, Flask, Face Recognition, SQL, Blockchain, Ganache/Web3

- Developed a Flask-based secure e-voting platform combining OTP authentication and real-time facial recognition for voter verification and one-person-one-vote enforcement.
- Integrated AI fraud detection heuristics with Ethereum-compatible smart contract transaction logging using Ganache and Web3 to create tamper-proof, auditable election records.

NeuroGuardian X – AI-Powered Predictive Healthcare Wearable — **Academic Project**

Technologies: ESP32, Flutter, IoT, Bluetooth BLE, ECG, AI Analytics, Firebase

- Engineered a wearable healthcare monitoring system using ESP32 and BLE telemetry to continuously capture ECG waveforms, heart rate, temperature, and motion.
- Developed a Flutter mobile application backed by Firebase delivering on-device edge AI health predictions, anomaly tracking, and automated GPS-enabled SOS emergency alerts.

EduTwin AI – Digital Twin-Based Smart Curriculum & Predictive Learning System Live Demo — **Academic Project**

Technologies: Python Flask, MySQL, Machine Learning, Chart.js

- Constructed an adaptive educational intelligence system creating a digital twin of student learning behavior, retention velocity, and topic weaknesses.
- Implemented automated personalized curriculum generation, adaptive difficulty scaling, memory-decay revision scheduling, and real-time Chart.js visual analytics.

Multilingual AI Speech Application Live Demo — **Feb 2026**

Technologies: Python, Google AI Studio APIs, Speech-to-Text, Text-to-Speech

- Built and deployed an AI speech translation application leveraging Google AI Studio APIs for real-time speech-to-text audio processing and synthesis across regional languages.

EDUCATION

- **Bachelor of Engineering (B.E.)** in Computer Science and Business Systems — **CGPA: 8.2 / 10.0** | 2023 – 2027
  Malnad College of Engineering, Hassan
- **Pre-University Course (Class 12 - PCMB)** – Brilliant PU College, Hassan — **91.0%**
- **SSLC (Class 10)** – Hassan Public School, Hassan — **78.0%**

CERTIFICATIONS & TRAINING

- **Python Full Stack with Gen AI Workshop** – Pentagon Space, Bengaluru
- **TCS iON Career Edge: Young Professional** – Tata Consultancy Services
- **Prompt Engineering for Everyone** – Cognitive Class / IBM Developer Skills Network
- **Build & Deploy Apps with Google AI Studio & Multilingual AI Speech App** – GUVI / HCL
- **Getting Started with Artificial Intelligence** – IBM SkillsBuild

ACHIEVEMENTS & LEADERSHIP

• Awarded **Top Innovation certification** at collegiate hackathon for developing an adaptive Quiz & Problem-Solving Web Platform; coordinated college technical events, demonstrating team leadership and project coordination.
