VINAY H M

Aspiring Software Engineer | Computer Science & Business Systems Student

Hassan, Karnataka | +91 91106 27745 | hmvinay355@gmail.com | LinkedIn | GitHub | Portfolio | Tableau

PROFESSIONAL SUMMARY

Computer Science and Business Systems student with hands-on experience across data analytics, full-stack web development, AI agent systems, computer vision, and IoT edge intelligence. Proficient in Java, Python, and C++, with working knowledge of JavaScript, Flask, SQL, and business data visualization. Completed an industrial Data Analytics internship with Intrainz, receiving a formal Letter of Recommendation. Seeking a Software Engineering or Data Analytics Internship to apply strong programming fundamentals and grow into full-stack and AI-driven development.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C++, JavaScript
- **Full-Stack Development:** Flask, REST APIs, HTML, CSS, JavaScript, Flutter (Mobile)
- **AI & Agent Frameworks:** LLM Integration (Google AI Studio APIs), Prompt Engineering, Machine Learning, Computer Vision, Edge AI (TFLite Micro)
- **Databases:** MySQL, SQL, SQLite, Firebase, Database Management Systems (DBMS)
- **Cloud, DevOps & Analytics:** Tableau, Power BI, Excel (Pivot Tables, Table Matrices), Git, GitHub, Version Control, Blockchain (Ganache/Web3)
- **CS Fundamentals:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

EXPERIENCE & INTERNSHIPS

Data Analytics Intern | Intrainz Innovation Pvt. Ltd., Bengaluru | Tableau, Data Cleansing, EDA, Pivot Tables, KPI Tracking

- Executed exploratory data analysis (EDA) and data preprocessing across structured enterprise sales and customer datasets, eliminating data discrepancies.
- Engineered interactive executive dashboards in Tableau using dynamic table matrices, scatter plots, and geo-maps to monitor revenue drivers and regional metrics.
- Result: Delivered high-impact business visual reports and earned an official Letter of Recommendation recognizing excellence in industrial deliverables (ID: 0126BDA8339).

Data Visualisation Job Simulation | Tata Consultancy Services (via Forage) | Tableau, Power BI, Business Analytics

- Framed business scenarios and structured targeted exploratory inquiries to align retail client analytics with senior leadership priorities.
- Result: Built interactive data presentations and dashboards in Tableau and Power BI to empower executive decision-making.

PROJECTS

VoteSphere DB – AI & Blockchain-Based Secure Voting System | Python, Flask, Face Recognition, SQL, Blockchain, Web3

- Developed a Flask-based secure e-voting system using OTP and real-time facial verification for voter authentication and one-person-one-vote enforcement.
- Integrated AI fraud detection heuristics with Ethereum-compatible blockchain transaction logging (Ganache/Web3) to ensure auditability and tamper resistance.
- Result: Delivered an end-to-end, tamper-proof voting framework guaranteeing absolute election record transparency and voter identity privacy.

NeuroGuardian X – AI-Powered Predictive Healthcare Wearable | ESP32, Flutter, IoT, Bluetooth BLE, ECG, AI Analytics, Firebase

- Engineered an AI-powered wearable healthcare system for real-time stress, ECG, heart-rate, body temperature, and motion monitoring using ESP32 and Flutter.
- Implemented on-device edge AI health predictions, personalized wellness insights, and automated GPS-enabled emergency SOS alerts through a companion mobile app.
- Result: Achieved continuous, autonomous real-time physiological anomaly detection with instant emergency alert broadcast capabilities.

EduTwin AI – Digital Twin-Based Smart Curriculum & Predictive Learning System | Python Flask, MySQL, Machine Learning, Chart.js

- Developed an adaptive learning platform that models student behavior, performance patterns, and weak topics using a Digital Twin architecture.
- Implemented personalized curriculum generation, adaptive difficulty scaling, revision scheduling via memory-decay prediction, and interactive Chart.js analytics.
- Result: Improved student learning efficiency by forecasting learning risks and providing dynamic, automated study plan interventions.

Multilingual AI Speech Application | Python, Google AI Studio APIs, Speech-to-Text, Text-to-Speech

- Built and deployed an AI-powered speech translation tool leveraging Google AI Studio APIs for real-time speech-to-text transcription and audio synthesis across regional languages.

EDUCATION

Bachelor of Engineering (B.E.) - Computer Science and Business Systems | Malnad College of Engineering | 2023–2027 (CGPA: 8.2/10)

PUC / Class 12 – Brilliant PU College, Hassan | 91%

SSLC / Class 10 – Hassan Public School, Hassan | 78%

CERTIFICATIONS

- Python Full Stack with Gen AI Workshop – Pentagon Space, Bengaluru
- TCS iON Career Edge: Young Professional – Tata Consultancy Services (Cert ID: 272697-32651218-1016)
- Prompt Engineering for Everyone – Cognitive Class / IBM Developer Skills Network (ID: c018af138d074780b8055e095346714b)
- Build & Deploy Apps with Google AI Studio & Multilingual AI Speech App – GUVI / HCL (ID: qBM4320Ap724d7Y01W)
- Getting Started with Artificial Intelligence – IBM SkillsBuild (Badge ID: 3f14fe00-53c9-4b65-94df-c62befefd136)
- What Is Generative AI? – LinkedIn Learning (ID: e26e665b5e2610360ba6d1e90f4506722447aee461cbb068b3f2745a64bce8cf)

ACHIEVEMENTS & LEADERSHIP

• Awarded the **Top Innovation certification** at college hackathon for developing a Quiz & Problem-Solving Web Platform; coordinated college-level technical events, demonstrating team leadership, public speaking, and project coordination.

LANGUAGES

English (Fluent) | Kannada (Native) | Hindi (Intermediate)
